fusion 360
rhinoceros
clo3d
autocad
keyshot
sketch
figma
adobe cc

hardware

3d printing (fdm, sls, sla, dlp, polyjet)
cnc
shop fabrication (wood, polymers, metals, ceramics)
surface finishing

experience

primer studios

industrial design intern

06.2022 – 09.2022

- provided different perspectives, insights, and constructive feedback to improve design projects and studio operations
- frequently exceeded studio and client expectations with exceptional time management and high fidelity deliverables
- created detailed renderings to provide studio and client cmf options using visual software: keyshot and adobe photoshop
- compiled presentations for clients and manufacturers using adobe software: photoshop, illustrator, and indesign
- designed components and assemblies ready for t0 and t1 sample injection molding using solidworks

wanderkit

ux/ui intern

02.2020 – 06.2020

- revamped wanderkit's front-end interface for improved interactive and visual design
- restructured information architecture by remapping user navigation resulting in improved user experience
- created new and additional travel and event related features for users during the covid-19 pandemic
- designed user experience prototypes using storyboards, models, wireframes, and click-throughs

wet design

rapid prototyping and modeling intern

09.2019 – 02.2020

- created models of the world expo 2020 dubai and hong kong skyplaza using rhino and solidworks for client presentations
- adjusted and applied visuals onto models for cohesive branding using adobe photoshop and illustrator
- rapid prototyped and created functional proof-of-concepts using 3d printers, laser cutters, and the model shop
